

ARPAN MUKHIA

Database Analyst • Data Analyst

Ontario, Canada | 905-464-3032 | arpanmukhia0311@gmail.com

PROFESSIONAL SUMMARY

Database Analyst with 1+ year of full-time experience extracting, cleaning, and analyzing data to support business decisions. Skilled in SQL, Tableau, and Excel, with hands-on experience building dashboards, preparing stakeholder reports, managing database systems, and translating technical findings into clear, actionable insights. Currently expanding expertise in AI-assisted analytics and statistical methods. Holds two postgraduate diplomas from Seneca College in Business Analytics and Project Management in IT. Legally authorized to work in Canada.

TECHNICAL SKILLS

SQL: Complex queries, joins, data extraction & transformation **Tableau:** Dashboards, KPI tracking, data visualization
Microsoft Excel: Pivot tables, VLOOKUP, formulas, reporting **Google Suite:** Sheets, Docs, Drive, collaborative reporting
AI Tools: Claude, ChatGPT, prompt engineering for analytics **Python:** Foundational scripting and data tasks

KEY COMPETENCIES

Data Extraction & Analysis • Data Cleaning & Validation • SQL Query Optimization • Dashboard & Report Development • Database Administration • Stakeholder Communication • Process Documentation • Root-Cause Problem Solving • Cross-Functional Collaboration • Statistical Analysis

WORK EXPERIENCE

Database Analyst July 2024 – August 2025

1862955 Ontario Inc. — Mississauga, Ontario | Full-Time, 40 hrs/week

- Collected and documented requirements from business users before making any system or database changes, ensuring the actual need was fully understood before any work began.
- Extracted and analyzed data from client databases using SQL — writing and optimizing queries for accurate, efficient data retrieval to support business decisions and reporting cycles.
- Cleaned, transformed, and validated large datasets regularly to maintain data quality and ensure that stakeholder reports reflected accurate, reliable information.
- Prepared reports and dashboards in Tableau and Excel, making outputs clear enough for stakeholders to use independently without a walkthrough each time new data was available.
- Monitored database performance on an ongoing basis, identified and resolved access issues and inconsistencies proactively, and implemented improvements to enhance system efficiency.
- Served as the point of contact between the database environment and business users, translating technical findings into plain language and following up until issues were fully resolved.
- Assisted with backup and recovery procedures to protect data continuity, and maintained documentation of all database workflows, processes, and system configurations.
- Used AI tools including Claude and ChatGPT to accelerate data summarization, draft SQL queries, and prepare stakeholder-ready report commentary more efficiently.

EDUCATION

Post-Graduate Certificate — Business Analytics December 2022

Post-Graduate Certificate — Project Management in IT December 2023

Bachelor of Science July 2021
